

AMENDMENTSIn the claims

Please cancel Claims 5 and 6, without prejudice.

Please amend Claims 1 and 7-12 as follows:

1 (Amended). A detergent composition comprising a cyclodextrin glucanotransferase enzyme and a detergent ingredient selected from the group consisting of a nonionic surfactant, a protease, a bleaching agent and mixtures thereof;
wherein said detergent composition comprises a starch binding domain;
wherein said starch binding domain is added to the detergent composition or is part of said cyclodextrin glucanotransferase
further wherein said starch binding domain is derived from glucoamylase of *Aspergillus niger*, β -galactosidase of *A. awamori* and mixtures thereof.

7 (Amended). A detergent composition according to claim 1 wherein said nonionic surfactant is selected from the group consisting of polyethylene oxide condensates of alkyl alcohols, amide oxide, polyethylene oxide condensates of alkyl acids and mixtures thereof.

8 (Amended). A detergent composition according to claim 1 wherein said bleaching agent is selected from the group consisting of [Mn (5,12-dimethyl-1,5,8,12-tetraaza-bicyclo [6.6.2] hexadecane) Cl₂]; [Mn (5,12-diethyl-1,5,8,12-tetraaza-bicyclo [6.6.2] hexadecane)]; the combination of percarbonate with a bleach activator selected from the group consisting of nonanoyloxybenzene-sulfonate, phenolsulfonate ester of N-nonanoyl-6-aminocaproic acid and/or tetraacetylenediamine; and mixtures thereof.

9 (Amended). A detergent composition according to claim 1 wherein the protease is derived from *Bacillus subtilis*.

10 (Amended). A detergent composition according to claim 1 further comprising an enzyme selected from the group consisting of a lipase, an alpha-amylase, a maltogenic alpha-amylase, an amyloglucosidase and mixtures thereof

11 (Amended). A method of using a cyclodextrin glucanotransferase enzyme and a detergent ingredient selected from the group consisting of a nonionic surfactant, a

protease, a bleaching agent and/or mixtures thereof, in a detergent composition for the hydrolysis of retrograded and raw starch comprising the step of contacting a fabric, dish or hard surface in need of treatment with the detergent composition of claim 1.

12 (Amended). The method according to claim 11 for the removal of starch-containing stains and soils, and when formulated as laundry compositions, for excellent whiteness maintenance and dingy cleaning comprising the step of contacting a fabric, dish or hard surface in need of treatment with the detergent composition of claim 1.
